CAREER OBJECTIVE

Driven and analytical individual with a strong interest in Artificial Intelligence, Machine Learning, and Data Science, committed to developing innovative and impactful technology solutions. Skilled in Python, Java and front-end development, with a passion for applying technical knowledge to solve real-world challenges. Dedicated to continuous learning, professional growth, and staying current with emerging technologies. Recognized for leadership, teamwork, analytical thinking, creativity, and effective problem-solving. Aspiring to contribute to forward-thinking organizations while building expertise in intelligent systems and data-driven decision-making.

EDUCATIONAL BACKGROUND

Bsc (Hons) Computing with Artificial Intelligence	2024 - Present
--	-----------------------

Islington College
London Metropolitan University
Kamal Marg, Kamal Pokhari, Kathmandu

SLC	2022 - 2024
------------	--------------------

United Academy
NEB
Kumaripati, Lalitpur

SEE	2022
------------	-------------

Annal Jyoti Boarding School
NEB
Dholahiti, Lalitpur

SKILLS

Technical Skills:

Programming Languages: C, Python, Java, SQL, JavaScript

Operating Systems: Windows, Linux (Basic)

Tools and Software: Power BI, Git, GitHub, Jupyter Notebook, Visual Studio Code, Eclipse,
Apache NetBeans, Microsoft Excel

Libraries/Frameworks: NumPy, Pandas, Matplotlib, Scikit-learn

Web Technologies: HTML, CSS

Soft Skills:

Leadership, Teamwork, Problem-Solving, Analytical Thinking, Creativity, Communication, Time Management, Adaptability, Continuous Learning

ACADEMIC PROJECTS

DriveKTM

Java, JSP, MySQL

- Developed a dynamic web-based vehicle rental management system using Java, JSP, and Servlets.
 - Integrated a MySQL database to manage customer, vehicle, and booking records with CRUD operations.
 - Deployed the application on Apache Tomcat, ensuring seamless interaction between the frontend, backend, and database.
-

GitGarden

HTML, CSS, JavaScript

- Developed an interactive web platform to help beginners learn Git through lessons and practical exercises.
 - Designed a responsive interface with quizzes and hands-on learning activities.
 - Focused on improving user engagement and accessibility.
-

Skin Care Management System

Python

- Developed an inventory and sales management system for a skincare business using Python.
 - Implemented product management, billing, inventory tracking, and automated invoice generation.
 - Utilized file handling to store and manage sales and inventory records.
-

Gym Management System

Java, Java Swing

- Developed a desktop application to manage gym memberships, attendance, and membership plans.
 - Applied object-oriented programming principles to build a modular and maintainable system.
 - Implemented member registration, loyalty points, and attendance tracking features.
-

Voter Card Registration System

Java, Java Swing

- Developed a desktop application for managing voter registration records.
- Implemented features for voter registration, record updates, deletion, and validation.
- Applied searching, sorting, and queue/stack data structures to improve data management efficiency.

Smart Farming with IoT

C++

- Designed and implemented an IoT-based smart farming system for automated irrigation.
 - Integrated environmental sensors to monitor soil moisture, temperature, humidity, and water levels in real time.
 - Enabled remote monitoring and pump control through the Blynk platform to improve water management.
-

PERSONAL PROJECTS

Personal Portfolio Website

HTML, CSS, JavaScript

- Designed and developed a responsive personal portfolio website to showcase projects, technical skills, certifications, and achievements.
 - Created an intuitive user interface with responsive layouts for desktop and mobile devices.
 - Optimized the website for performance, accessibility, and seamless navigation.
-

FutPundit - Football Chatbot

Python, Flask

- Developed a football-focused chatbot that provides responses to user queries using a custom knowledge base.
 - Designed and organized domain-specific football data to deliver accurate and relevant information without relying on external APIs.
 - Implemented conversational logic to create an interactive and user-friendly question-and-answer experience.
-

TRAINING AND CERTIFICATIONS

AWS Academy Data Engineering - AWS

Dec 2024

AWS Academy Machine Learning Foundations - AWS

Dec 2024

Machine Learning for Natural Language Processing - AWS

Dec 2024

Foundations: Data, Data, Everywhere - Google

Nov 2024

Python for DataScience, AI & Development - IBM

Aug 2024

Introduction to Front-End Development - Meta

Aug 2023
